Gangs of london ioan death

Ace but the brutal crime thriller *Gangs Of London* has just landed on our screens in a rain of blood and bullets. It's a very hard, very complex story of several criminal factions in the capital as well as an intense family saga that begins with the crime lord and head of the Wallace family, Finn (Colm Meaney), being murdered. Here's an intense nine-part thriller filled with twists, turns, surprises and huge body count. It's also very complicated. Here's our handy guide to what happens in the final, what it means for the second series and where all the key players are left at the end of *Gangs Of London*. Who killed Finn Wallace? As we saw in the first episode, the actual hit performed by Darren (Aled ap Iffan) with Ioan (Darren Evans) drove him. Both are now dead. The Danish militia ordered the attack, responding to a task from Jevan Kapadia (Ray Panthaki), who in turn worked for the mysterious people known only as The Investors. They cripple Finn because he plans to leave the business and disappear to a private island he has bought along with a luxury yacht called The Floriana. The yacht is named after Finn's pregnant mistress (Arta Dobroszi) who he plans to disappear, leaving behind his wife Marian (Michelle Fairley) and his family. Ed (Lucian Msamati) and Alex (Paapa Essiedu) are formed to be in charge of this business. This reverses our perspective on what the state of affairs is in London. At the beginning of the series we see Finn and Ed as the most powerful people in the city with no doors closed. Instead we discover that Finn is controlled by The Investors, loses the money handing over his fists and robs Peter to pay Paul. He's had enough. Putting Alex and Ed in the frame rather than Sean could even be a good thing for Sean. Jevan tells Ed that Floriana was murdered on the same day as Finn but that's not true. Instead Leif (Mads Koudal) of the Danish Militia keeps him in the basement of the house where he lives with his mother. She promised them money but only when she found out the baby was safe. It is suggested that Floriana may have had access to the money Finn stole for various gangs and investors. Floriana gave birth but instead let Leif and her mother take the child and the money she pushed her mother down the stairs and ran away with her baby. The episode is directed by Xavier Gens who makes *Frontier* and Floriana's shot of her running down the street look like parallel to the scene where *Frontier* heroine Karina Testa escapes neo-Nazis. Floriana doesn't play the lead role in *Gangs Of London* but if *Gangs Of London* gets a second season, however, Floriana will definitely play a big role - more on that below. What happened to Marian? Marian was shot in the grave by Ed, we see him and assume he's dead. But in a cheeky flashback to the previous day, at the end of the last episode, the tables are turned. A woman pushing a pram is seen in sight through the graveyard. She approaches Marian's degenerate body and when she says her name, we see Marian open her eyes. Marian. I will help you, he said and we realize, OMG! It's Floriana! In this very short epilogue Floriana looks healthy and well dressed. This short scene could hold the key to what season two can hold. If Floriana has access to the money Finn stole and he joins Marian both will be a force to be reckoned with. Marian has shown that she can be as cruel and cruel as her husband. Floriana is clearly smart, resourceful and not above pushing an old lady down the stairs. It's possible that The Investor didn't know that Floriana was actually still alive. The only people who know are Leif and his mother and they are unlikely to say because that means admitting to investors that they plan to take his money - money Finn stole from The Investors. It is possible that Marian is also believed to have died after Ed shot him, so that both could be powerful counter forces in the capital, have money and are invisible. Who are the Investors? We don't really know, other than that they are in the highest echelons of power and have influence everywhere and are unlikely to ever get their hands dirty - Investors want the control and order that Finn Wallace brings (before he starts stealing from everyone and decides he wants out of business). In The Investors credits are listed as Mr Jacob and Ms Kane and played by Tim McInnerny and Amanda Drew. Exactly who The Investors are, how widespread their reach is and exactly how much power they use could be the focus of season 2 if the show were to get it. The fact that these characters are named in the credits (but never in the show) suggests that they have a bigger part to play. We also don't know exactly who killed Jevan - he was thrown out of the window to some nails but it's unclear who did this, and who was in The Investors' pocket. Vicky (Jing Lusi) is killed by Shannon (Pippa Bennett-Warner), Anthony (David Avery) is killed by one of marian's men. Elliot (Sope Dirisu) seems to be now working for The Investors. Investors instruct Elliot in exchange for ensuring the safety of Shannon and Danny (Taye Matthew). Elliot was arrested and the water was boarded for information in what he said was now a terrorist investigation. While he had a medical professional who said he needed to check his vital signs gave him a code: I was protected under diplomatic immunity under the republic of Panama. When Elliot talks this, the chief interrogator calls his boss, and is forced to let Elliot go free, warning him he's buying his way into the very world While he is being interrogated Elliot is allowed to make a phone call to his father (Jude Akuwudike). Using a little vague reference his father would understand he told him to leave London and head to Jamaica. Using boxing references from his childhood he told his father his father it would look like he took a fall in the third but that he would take it all the way. This is significant because of this call that we understand that although it looks like he is now working for The Investors, instead he plans to drop them. He finishes by telling his father that pawns can be king (again, referring to the memory of the early boxing matches). Still having a microchip given to him by Sean (Joe Cole), who keeps information about Investors, tax havens and high-level corporate corruption, Elliot is now on a mission to take on the big boys. Is Sean really dead? Elliot shoots Sean in the face because The Investors have instructed him that Sean is never allowed to take a stand (probably because he knows too much) but that Alex should keep playing. Elliot shot Sean in the cheek. Then we hear the police who raided the club say Sean Wallace is dead. But we didn't really see the body. So we hope he doesn't die and that he might return for a second season. Elliot is too smart and trained to shoot Sean in the cheek rather than the forehead by accident. The decision to point out very specifically where he was hit but not his body greatly left his death ambiguous. Maybe the police announced his death to convince Investors he was out of the picture. Could Sean be working with the police in a potential second season? What happened to Luan? Finn posthumously steals Luan's (Orli Shuka) money and money belonging to a Nigerian led by Mosi (Richard Pepple) that Ed has promised to launder for Luan. The net money transfer through the investment bank was not passed through and it became clear that it must have been something Finn arranged before he died, through an offshore account. Mosi and Nigerians visitEd London, went to an investment bank and cut off the right hands of all the employees there. They then went to Luan's daughter's birthday party and threatened to slaughter her entire family if she didn't get her money back. Luan sent one of his men to take down the Nigerian but he was chopped up and put in a laundry basket. Captured by the Nigerians and with his family under threat Luan took them and won, killing them all. He was persuaded by his wife to leave town so that rival gangs remembered still going to kill each other and he could come back stronger. Luan could definitely return for a second season and he is clear that his intention is to return to London and take over now many of his rivals are out of the picture. Where did Lale end up? With his business undermined by Asif (Asif Raza Mir) and all his staff including his butchered right hand, Lale (Narges Rashidi) is determined to take revenge. He helped Sean to assemble the materials he needed to Belvedere Tower. Then he visits Asif's son Nasir (Parth Thakerar) on the day of his victory party to celebrate his appointment as London's new mayor and kill him, cutting out his tongue and marking with 'X' - to show the X in the box as on the voting slip. Wearing a blonde wig and glasses she approached Asif and told him he was looking forward to hearing Nasir speak. She tells Asif that she gave her son his voice and when he shook his hand he left her bleeding. Asif rushes to the party where he finds his son's body. Lale has sex with Sean and tells him he's going back to Kurdistan, explaining he stands only for his country's freedom while Sean stands up for nothing. There's a chance Lale could return for a second season but it feels like his story has ended now his team has all been killed and his loyalty is to his home. Who else didn't die at the end of the *Gangs Of London*? Billy (Brian Verne) and Jackie (Valene Kane) are still alive and have gone abroad and changed their names. Ed is still alive, as is Alex, and both may now work for The Investors. Leif and her mother are still alive but get nothing from Floriana's abduction. Shannon and Danny are still alive and have fled London. Asif is alive but destroyed by grief. Sadness.
